AIAPGET-2021

Subject : AIAPGET_S21_HOME0_S01

Question ID:- 121

Which is the largest branch of Axillary Artery?

Options:-

- **Acromio - Thoracic Artery, Option ID :- 481 ,**
- **Lateral Thoracic Artery, Option ID :- 482 ,**
- **Subscapular Artery, Option ID :- 483 ,**
- **Superior Thoracic Artery, Option ID :- 484,**

Question ID:- 122

What is the nerve supply of cremasteric muscle?

Options:-

- **Femoral nerve, Option ID :- 485 ,**
- **Genital branch of genitofemoral nerve, Option ID :- 486 ,**
- **Ilioinguinal nerve, Option ID :- 488 ,**
- **Obturator nerve, Option ID :- 487**

Question ID:- 123

Which one of the following structure does not pass through the lesser sciatic foramen?

Options:-

- **Inferior gluteal nerve, Option ID :- 492 ,**
- **Internal pudendal vessels, Option ID :- 491 ,**
- **Obturator internus tendon, Option ID :- 489 ,**
- **Pudendal nerve, Option ID :- 490,**

Question ID:- 124

▪
Which one of the following is not the content of Hunter's canal?

Options:-

- Femoral artery , Option ID :- 494 ,
- Nerve to vastus lateralis , Option ID :- 495 ,
- Nerve to vastus medialis , Option ID :- 496 ,
- Saphenous nerve , Option ID :- 493,

Question ID:- 125

At the mid axillary line, parietal pleura extends upto the level of which rib?

Options:-

- 10th , Option ID :- 499 ,
- 11th , Option ID :- 500 ,
- 8th , Option ID :- 497 ,
- 9th , Option ID :- 498,

Question ID:- 126

Which is the correct statement about the lumbrical muscles of the hand?

Options:

- 1st and 2nd Lumbricals are innervated by median nerve , Option ID :- 503 ,
- 3rd and 4th Lumbricals are innervated by superficial branch of the ulnar nerve , Option ID :- 504 ,
- All arise from tendons of flexor digitorum superficialis , Option ID :- 501 ,
- Each is attached to the medial margin of the dorsal digital expansion of the corresponding finger , Option ID :- 502,

Question ID:- 127

The most abundant single type of cell present in Human Body is

Options:

- Glial cell, Option ID :- 508 ,
- Myofibril, Option ID :- 507 ,

▪ Neuron, Option ID :- 505 ,	

▪Red Blood Cell, Option ID :- 506,

Question ID:- 128

Match List I with List II

List I List II

Co-enzyme Group Transferred

A. Thiamine pyrophosphate (TPP) I. One Carbon Groups

B. Pyridoxal phosphate (PLP) II. Hydroxyethyl

C. Tetrahydrofolate (FH₄) III. Phosphate

D. Adenosine triphosphate IV. Amino Group

Choose the correct answer from the options given below:

Options:-

▪A - II, B - IV , C - I , D - III , Option ID :- 509 ,

▪A - III, B - I , C - IV , D - II , Option ID :- 510 ,

▪A - IV , B - II , C - I , D - III , Option ID :- 511 ,

▪A - IV , B - III , C - II , D - I , Option ID :- 512,

Question ID:- 129

Among the enzymes given below, which is not a Key Gluconeogenic enzyme

Options:-

▪Fructose 1 - 6 bisphosphatase, Option ID :- 515 ,

▪Phosphoenol pyruvate carboxy kinase, Option ID :- 514 ,

▪Pyruvate carboxylase, Option ID :- 513 ,

▪Pyruvate kinase, Option ID :- 516,

Question ID:- 130

Given below are two statements, one is labelled as Assertion A and the other is labelled as Reason R Assertion A: "Maculae" are Sensory Organs of the Utricle and Saccule is responsible for detecting Orientation of the Head with respect to Gravity. Reason R: During angular acceleration, cupula and its embedded hairs move in maculae. In light of the above statements, choose the *correct* answer from the options given below

Options:

▪

▪A is false but R is true , Option ID :- 520 ,

▪A is true but R is false , Option ID :- 519 ,

▪Both A and R are true and R is the correct explanation of A , Option ID :- 517 , ▪Both A and R are true but R is NOT the correct explanation of A , Option ID :- 518,

Question ID:- 131

Name the Amino acid that undergoes Oxidative deamination in tissues

Options:

▪L - Aspartate , Option ID :- 521 ,

▪L - Glutamate , Option ID :- 522 ,

▪L - Glutamine , Option ID :- 524 ,

▪L - Glycine , Option ID :- 523,

Question ID:- 132

Among the substances given below, name the substance which is filtered but not reabsorbed by kidneys.

Options:

▪Bicarbonate, Option ID :- 525 ,

▪Creatinine, Option ID :- 528 ,

▪Potassium, Option ID :- 526 ,

▪Urea, Option ID :- 527,

Question ID:- 133

Which of the following injury resembles Heat ruptures

Options:

▪Abrasion, Option ID :- 530 ,

▪Contusion, Option ID :- 532 ,

▪Laceration, Option ID :- 531 ,

▪Stab, Option ID :- 529,

Question ID:- 134

First external sign of putrefaction in a dead body lying in air is seen over the region of
Options:-

▪Caecum, Option ID :- 536 ,

▪Liver, Option ID :- 534 ,

▪Spleen, Option ID :- 535 , Stomach, Option ID :- 533,

Question ID:- 135

Which Act empowers the Central Government to form a Drug Technical Advisory Board and to establish a central Drugs Laboratory, to help and advice both the Central and State Governments.

Options:-

▪Drug and Magic Remedies Act, 1954, Option ID :- 538 ,

▪Drugs and Cosmetics Act, 1940, Option ID :- 539 ,

▪Mental Health Act, 1987, Option ID :- 540 ,

▪The Prevention of Food Adulteration Act, 1954, Option ID :- 537,

Question ID:- 136

Match List I with List II

List I List II

Name of phobia Explanation

A. Xenophobia I. Fear of water

B. Hydrophobia II. Fear of high places

C. Claustrophobia III. Fear of strangers

D. Acrophobia IV. Fear of being in closed or confined spaces Choose the correct answer from the options given below:

Options:-

▪A - II, B - I, C - IV, D - III , Option ID :- 541 ,

▪A - II, B - IV, C - III, D - I , Option ID :- 544 ,

▪A - III, B - I, C - IV, D - II , Option ID :- 542 ,

▪A - III, B - II, C - I, D - IV , Option ID :- 543,

▪

Question ID:- 137

In puerperium, the correct sequence of appearance of lochia is

Options:-

▪ **Alba, Rubra, Serosa, Option ID :- 548 ,**

▪ **Alba, Serosa, Rubra, Option ID :- 547 ,**

▪ **Rubra, Serosa, Alba, Option ID :- 546 ,**

▪ **Serosa, Alba, Rubra, Option ID :- 545,**

Question ID:- 138

Match List I with List II

List I List II

A. Swiss Cheese

i. Hydatidiform mole

Endometrium

B. Strawberry Vagina ii. Tubercular

Peritonitis

C. Grape like vesicles iii. Trichomoniasis iv. Metropathia

D. Doughy Abdomen

Haemorrhagica

Choose the *correct* answer from options given below:

Options:-

A - ii, B - iv, C - i, D - iii , Option ID :- 552 ,

▪ **A - iii, B - i, C - ii, D - iv , Option ID :- 549 ,**

▪ **A - iv, B - iii, C - i, D - ii , Option ID :- 551 ,**

▪ **A - iv, B - iii, C - ii, D - i , Option ID :- 550,**

Question ID:- 139

Given below are two statements, one is labelled as Assertion A and the other is

labelled as Reason R Assertion: The external os is closed in threatened miscarriage

Reason: In Threatened miscarriage, the process of miscarriage has started but has not progressed to a state from which recovery is impossible. In light of the above statements, choose the *correct* answer from the options given below

Options:

▪ **A is false but R is true , Option ID :- 556 ,**

▪ **A is true but R is false , Option ID :- 555 ,**

▪ **Both A and R are true and R is the correct explanation of A , Option ID :- 553 ,** ▪ **Both A and R are true but R is NOT the correct explanation of A , Option ID :- 554,**

Question ID:- 140

Given below are two statements, one is labelled as Assertion A and the other is labelled as Reason R
Assertion A: Lactational amenorrhoea method (LAM) is effective as a method of contraception only for 6 months post partum, provided regular breast feeding is done with atleast one night feed. **Reason R:** High levels of prolactin prevent FSH surge and ovulation. In light of the above statements, choose the *most appropriate* answer from the options given below

Options:

- A is correct but R is not correct , Option ID :- 559 ,
- A is not correct but R is correct , Option ID :- 560 ,
- Both A and R are correct and R is the correct explanation of A , Option ID :- 557 ,
- Both A and R are correct but R is NOT the correct explanation of A , Option ID :- 558,

Question ID:- 141

The sonographic diagnosis of absence of fetal pole in a gestational sac with a diameter of 3cm or more is known as

Options:

- Blighted Ovum, Option ID :- 562 ,
- Blood mole, Option ID :- 563 ,
- Carneous Mole, Option ID :- 561 ,
- Vesicular mole, Option ID :- 564,

Question ID:- 142

A 30 year old female presents in OPD with white milky discharge per vagina with fishy odor. On interrogation she says that she has only minimal vulval irritation. What is the most probable diagnosis:

Options:-

- Candidiasis, Option ID :- 566 ,
- Chlamydial Infection, Option ID :- 568 , Gardnerella Vaginosis, Option ID :- 565 ,
- Trichomoniasis, Option ID :- 567,

▪

Question ID:- 143

During Labour, the condition in which there is no physiological differentiation of active upper segment and passive lower segment of uterus is known as:

Options:

- **Constriction ring, Option ID :- 569 ,**
- **Pathological retraction ring, Option ID :- 570 ,**
- **Uterine atony, Option ID :- 571 ,**
- **Uterine tetany, Option ID :- 572,**

Question ID:- 144

A 28 year old female undergoes a Pelvic ultrasound in the premenstrual phase to assess her Endometrial thickness. The normal endometrial thickness in this phase should be:

Options:

- **2 - 4mm , Option ID :- 573 ,**
- **4 - 6mm , Option ID :- 574 ,**
- **6 - 8mm , Option ID :- 575 ,**
- **8 - 12mm , Option ID :- 576,**

Question ID:- 145

Quadrupule (Quad) screening test done during pregnancy includes:

Options:

- **hCG, PAPP-A, unconjugated estriol ,serum progesterone, Option ID :- 579 ,**
- **MSAFP, dimeric inhibinA, hCG,NT, Option ID :- 580 ,**
- **MSAFP, unconjugated estriol, dimeric inhibin -A, hCG, Option ID :- 577 ,**
- **Unconjugated estriol,Serum progesterone,hCG, MSAFP, Option ID :- 578,**

Question ID:- 146

Match List I with List II

List I List II

Color of Liquor Amni Abnormality

- | | |
|---------------------------|----------------------------------------------|
| A. Dark brown | I. Postmaturity |
| B. Golden | II. Intra uterine death |
| C. Greenish Yellow | III. Concealed accidental haemorrhage |

D. Dark color IV. Rh incompatibility

Choose the correct answer from the options given below:

Options:-

▪A - II, B - I, C - IV, D - III , Option ID :- 582 ,

▪A - II, B - IV, C - I, D - III , Option ID :- 584 ,

▪A - III, B - I, C - IV, D - II , Option ID :- 583 ,

▪A - III, B - II, C - IV, D - I , Option ID :- 581,

Question ID:- 147

Migration study is a type of

Options:-

▪Case Control study, Option ID :- 586 ,

▪Cohort study, Option ID :- 587 ,

▪Descriptive epidemiological study, Option ID :- 585 , ▪Randomized Controlled Trial, Option ID :- 588

Question ID:- 148

In Japanese Encephalitis epidemiology, Pig acts as

Options:-

▪Amplifier host, Option ID :- 590 ,

▪Dead end host, Option ID :- 591 ,

▪Intermediate host, Option ID :- 592 ,

▪Mosquito attractant, Option ID :- 589,

Question ID:- 149	
Match List I with List II	
List I List II	
Indicators of health Examples	
A. Mortality Indicator I. Incidence and Prevalence	

B. Morbidity Indicator II. Dependency Ratio

C. Disability Indicator III. Life Expectancy

D. Socio - economic IndicatorIV. Limitation of mobility

▪
Choose the *correct* answer from the options given below:

Options:-

▪A - I, B - III, C - IV, D - II , Option ID :- 593 ,

▪A - III , B - II, C - IV, D - I , Option ID :- 594 ,

▪A - III, B - I, C - IV, D - II , Option ID :- 595 ,

▪A - III, B - IV, C - I, D - II , Option ID :- 596,

Question ID:- 150

Consider the following statements: A. Apolipoprotein-A-1 is a type of HDL protein
B. Apolipoprotein-B is a type of LDL protein C. For prevention of Coronary Heart Disease recommended total cholesterol: HDL Ratio should be below 5.5. D. HDL Cholesterol is protective against development of Coronary Heart Disease Choose the *correct* set of statements from the options given below:

Options:-

▪A, B and C only , Option ID :- 598 ,

▪A, B and D only , Option ID :- 600 ,

▪A, C and D only , Option ID :- 597 ,

▪B, C and D only , Option ID :- 599,

Question ID:- 151

Consider the following statements : A. Animal food does not contain any fibre.
B. Vitamin B12 is not present in foods of vegetable origin. C. Dietary antioxidants always are of very high nutritive value. D. Vitamin D is not present in natural vegetable food. Choose the *correct* set of statements from the options given below:

Options:-

- **A, B and D only , Option ID :- 604 ,**
- **A, B and C only , Option ID :- 601 ,**
- **A, C and D only , Option ID :- 603 ,**
- **~~B, C and D only , Option ID :- 602,~~**

Question ID:- 152

Limitation of freedom of movement of well persons exposed to communicable disease for a period of time not longer than the longest usual incubation period of the disease, to prevent effective contact with those not so exposed is defined as-

Options:

- **Eradication, Option ID :- 608 ,**
- **Isolation, Option ID :- 605 ,**
- **Quarantine, Option ID :- 606 ,**
- **Surveillance, Option ID :- 607,**

Question ID:- 153

Given below are two statements, one is labelled as Assertion A and the other is labelled as Reason R. Assertion A: A palpable gallbladder in a patient with obstructive jaundice is not due to impacted duct stones. Reason R: In carcinoma of head of the pancreas, gallbladder is distended and palpable to the right of rectus muscle in the right hypochondrium. In light of the above statements, choose the *correct* answer from the options given below

Options:

- **A is false but R is true , Option ID :- 612 ,**
- **A is true but R is false , Option ID :- 611 ,**
- **Both A and R are true and R is the correct explanation of A , Option ID :- 609 ,**
- **Both A and R are true but R is NOT the correct explanation of A , Option ID :- 610 ,**

Question ID:- 154

Blumer's shelf refers to neoplastic thickening of

Options:

- Morison's pouch, Option ID :- 613 ,
- Rectoprostatic fascia, Option ID :- 616 ,
- Rectosacral fascia, Option ID :- 614 ,
- Rectovesical pouch, Option ID :- 615,

Question ID:- 155

Match List I with List II

List I List II

Different sign

Disease condition

A. London's sign I. Haemorrhagic Pancreatitis

B. Grey Turner sign II. Blunt Abdominal trauma

C. Mercedes Benz sign III. Oesophageal CA D. Rat tail sign IV. Cholelithiasis

Choose the correct answer from the options given below:

Options:- ▪ A - II, B - I, C - IV, D - III , Option ID :- 618 ,

▪ A - III, B - II, C - I, D - IV , Option ID :- 619 ,

▪ A - IV, B - II, C - I, D - III , Option ID :- 617 ,

▪ A - IV, B - III, C - II, D - I , Option ID :- 620,

Question ID:- 156

Burch-Wartofsky score is used to assess

Options:

- Femoral hernia, Option ID :- 623 ,
- Meckel's Diverticulum, Option ID :- 624 ,
- Rectal carcinoma, Option ID :- 621 ,
- Thyroid storm, Option ID :- 622,

Question ID:- 157

The most common cause of intestinal obstruction in children between 6 months and 2 years of age is

Options:

- Intestinal adhesions, Option ID :- 626 ,
- Intestinal TB, Option ID :- 628 ,

▪Intussusception, Option ID :- 627 ,

▪Obstructed hernia, Option ID :- 625,

Question ID:- 158

Consider the following statements in von Recklinghausen's disease: A. It is an autosomal dominant disorder B. Chromosome 27 is involved C. Cafe au lait spots are characteristic D. Does not turn into sarcoma E. Cranial, spinal and peripheral nerves are involved Choose the *correct* answer from the options given below:

Options:

▪A, B and C only , Option ID :- 630 ,

▪A, B and D only , Option ID :- 629 ,

▪A, C and E only , Option ID :- 631 ,

▪B, D and E only , Option ID :- 632,

Question ID:- 159

A 68 years old male presents with bright red painless bleeding per rectum. He has an associated history of weight loss, recent change in bowel habit and a sensation of incomplete defecation. Provisional diagnosis is:

Options:

▪Anal fissure, Option ID :- 636 ,

▪Haemorrhoids, Option ID :- 633 ,

▪Rectal cancer, Option ID :- 634 ,

▪Ulcerative colitis, Option ID :- 635,

Question ID:- 160

Consider the following statements in Paget's disease of the nipple- A. It is superficial manifestation of an intra-ductal carcinoma. B. Characterised by hard nodule underneath the areola with ulceration and destruction of nipple. C. It mimics eczema of nipple and areola. D. Histologically it contains Askanazy cells with malignant features. E. Mostly seen in lactating women. Choose the *correct* answer from the options given below:

Options:-

▪A, B and C only , Option ID :- 637 ,

▪A, C and E only , Option ID :- 640 ,

▪B, C and E only , Option ID :- 638 , ▪B, D and E only , Option ID :- 639,

Question ID:- 161

Consider the following statements. A. Cellulitis is more superficial than erysipelas. B. Tuberculous ulcer is usually painless except on the tongue. C. Keloid contains proliferating immature fibroblasts and thick collagen stroma. D. Dermoid cyst is transilluminating in nature. Choose the correct answer from the options given below:

Options:-

▪A and C only , Option ID :- 644 ,

▪A and D only , Option ID :- 642 ,

▪B and C only , Option ID :- 641 ,

▪C and D only , Option ID :- 643,

Question ID:- 162

Consider the following statements regarding sensorineural hearing loss. A. Rinne test Positive. B. Weber test- lateralized to poor ear. C. Audiometry- no gap between air and bone conduction curve. D. More often involving low frequencies. E. Speech discrimination is poor with difficulty in hearing in noise. Choose the *correct* answer from the options given below:

Options:-

▪A, B and D only , Option ID :- 645 ,

▪A, C and E only , Option ID :- 647 ,

▪B, C and D only , Option ID :- 648 , ▪B, D and E only , Option ID :- 646,

Question ID:- 163

Consider the following statements in Haematuria- A. Microscopic haematuria is always abnormal. B. Painful haematuria indicates malignant pathology. C. Haematuria at the start of urinary stream indicates a cause in the upper urinary tract. D. Terminal haematuria is caused by bladder irritation or infection or prostate origin. E. False haematuria is discolouration of urine from pigments such as food colouring and myoglobin. Choose the *correct* answer from the options given below:

Options:-

▪A, B and C only , Option ID :- 649 ,

▪A, D and E only , Option ID :- 652 ,

▪B, C and E only , Option ID :- 650 ,

▪B, D and E only , Option ID :- 651,

Question ID:- 164

A 23 years old female patient presented with pain in hypogastrium, frequency of micturition, tenesmus and diarrhoea with vomiting. On examination she reveals- A. Tenderness in right side of pelvis on internal examination. B. Shrunk look with dehydration. C. Tachycardia. D. Fever. E. Attempt to flex and rotate hip aggravates pain. Choose the correct answer from the options given below regarding the provisional diagnosis

Options:-

▪Acute appendicitis , Option ID :- 654 ,

▪Acute salpingitis , Option ID :- 656 ,

▪Amebic colitis , Option ID :- 653 ,

▪Ureteric calculus , Option ID :- 655,

Question ID:- 165

The investigation of choice in suspected spontaneous subarachnoid hemorrhage is

Options:

▪CT scan of head and brain, Option ID :- 658 ,

▪Lumbar puncture, Option ID :- 659 ,

▪MRI Angiography, Option ID :- 657 ,

▪Ultrasound scan, Option ID :- 660,

Question ID:- 166

All are features of Prinzmetal angina except

Options:

▪Chest pain at rest, Option ID :- 661 ,

▪ST segment depression with chest pain, Option ID :- 663 ,

▪ST segment elevation during chest pain, Option ID :- 662 ,

▪Transmural Ischemia, Option ID :- 664,

Question ID:- 167

Carpal tunnel syndrome is seen in all except

Options:

▪Myxedema, Option ID :- 666 ,

▪Parkinsonism, Option ID :- 668 ,

▪Pregnancy, Option ID :- 665 ,

▪Rheumatoid arthritis, Option ID :- 667,

Question ID:- 168

The biochemical abnormality commonly seen in patients of Multiple Myeloma is:

Options:

▪Hypercalcemia, Option ID :- 669 ,

▪Hyperkalemia, Option ID :- 671 ,

▪Hypocalcemia, Option ID :- 670 ,

▪Hypokalemia, Option ID :- 672,

Question ID:- 169

The fundamental defect in Myasthenia Grevis is: Options:-

▪Decrease in number of acetylcholine receptors, Option ID :- 675 ,

▪Decrease in number of acetylcholine vesicles, Option ID :- 676 ,

▪Decrease in synthesis of acetylcholine, Option ID :- 674 ,

▪Deficiency of acetylcholinesterase, Option ID :- 673,

Question ID:- 170

Sweat electrolyte measurement is used in the diagnosis of:

Options:

▪Asbestosis, Option ID :- 679 ,

▪Cystic fibrosis, Option ID :- 680 ,

▪Phenylketonuria, Option ID :- 677 ,

▪Sarcoidosis, Option ID :- 678,

Question ID:- 171

The most sensitive test for the diagnosis of Gout is:

Options:

▪Needle aspiration of joint fluid, Option ID :- 683 ,

▪Serum creatinine estimation, Option ID :- 684 ,

▪Serum uric acid estimation, Option ID :- 681 ,

▪X-ray, Option ID :- 682,

Question ID:- 172

The major cause of mortality in patients of Autosomal dominant polycystic kidney disease is:

Options:

▪Cardiovascular complications, Option ID :- 685 ,

▪Infection, Option ID :- 686 ,

▪Renal cell carcinoma, Option ID :- 687 ,

▪Rupture of renal cyst, Option ID :- 688,

Question ID:- 173

Transudative and exudative pleural effusions are distinguished by measuring:

Options:

▪Alkaline phosphatase, Option ID :- 692 ,

▪Aspartate aminotransferase, Option ID :- 690 ,

▪Creatinine phosphokinase, Option ID :- 689 ,

▪Lactate dehydrogenase, Option ID :- 691,

Question ID:- 174

Which of the following are common features of Guillain-Barre syndrome: A. Areflexia B. Exaggerated deep tendon reflexes C. Ascending paralysis D. Autonomic dysfunction Choose the *correct* answer from the options given below:

Options:- ▪A, B and C only , Option ID :- 695 ,

▪A, B and D only , Option ID :- 693 ,

▪A, C and D only , Option ID :- 694 ,

▪B, C and D only , Option ID :- 696,

Question ID:- 175

The Schilling test is used to determine the cause of:

Options:

▪Vitamin B12 deficiency, Option ID :- 700 ,

▪Vitamin B2 deficiency, Option ID :- 698 ,

▪Vitamin B6 deficiency, Option ID :- 699 ,

▪Vitamin B1 deficiency, Option ID :- 697,

Question ID:- 176

The correct statements about the *a*-wave in venous waveform are: A. It reflects right ventricular contraction. B. It reflects right atrial presystolic contraction. C. It occurs just after electrocardiographic P wave. D. It precedes the first heart sound (S1). E. It follows the second heart sound (S2). Choose the *correct* answer from the options given below:

Options:

▪A, B and D only , Option ID :- 701 ,

▪A, C and E only , Option ID :- 702 ,

▪B, C and E only , Option ID :- 704 ,

▪B, C, and D only , Option ID :- 703,

Question ID:- 177

An eight year old boy developed intense itch in interdigital spaces of fingers, palms and over ulnar border of forearms. Examination revealed excoriations, papules and tiny linear white marks in the affected parts. The most likely diagnosis is:

Options:

- Papular urticaria, Option ID :- 708 ,
- Scabies, Option ID :- 707 ,
- Tinea mannum, Option ID :- 705 ,
- Tinea unguium, Option ID :- 706,

Question ID:- 178

Which of the following is/are criteria for the diagnosis of Diabetes mellitus? A. Fasting plasma glucose 100-125 mg/dl B. 2-hour plasma glucose between 140-199 mg/dl following an oral glucose challenge C. HbA1c \geq 6.5% D. Random plasma glucose \geq 150 mg/dl
Choose the *correct* answer from the options given below:

Options:

- A, B and D only , Option ID :- 709 ,
- B and C only , Option ID :- 710 ,
- C only , Option ID :- 711 ,
- D only , Option ID :- 712,

Question ID:- 179

The most common cause of nail pterygium is:

Options:-

- Digital ischemia, Option ID :- 715 ,
- Lichen planus, Option ID :- 713 ,
- Pemphigus, Option ID :- 716 ,
- Trauma, Option ID :- 714,

Question ID:- 180

The most common cause of Neonatal hypothyroidism is:

Options:

- Inborn errors of thyroid hormone synthesis, Option ID :- 717 ,
- Maternal antithyroid treatment, Option ID :- 720 ,
- Thyroid gland dysgenesis, Option ID :- 718 ,
- TSH-R blocking antibodies, Option ID :- 719,

Question ID:- 181

10,00,00th potency in Centesimal scale is designated as

Options:

- 1M , Option ID :- 721 ,
- 50M , Option ID :- 722 ,
- CM , Option ID :- 724 ,
- MM , Option ID :- 723,

Question ID:- 182

Match List I with List II

List I	List II
Classes of old Mother tincture Preparation	Sources(Examples)
A. CLASS IV	I. Lycopodium clavatum
B. CLASS IX	II. Hekla lava
C. CLASS V(B)	III. Lyssin
D. CLASS VII	IV. Fluoric acid

Choose the correct answer from the options given below:

Options:-

- A - I, B - II, C - III, D - IV , Option ID :- 725 ,
- A - I, B - III, C - IV, D - II , Option ID :- 727 ,
- A - II, B - IV, C - III, D - I , Option ID :- 726 ,
- A - IV, B - III, C - II, D - I , Option ID :- 728,

Question ID:- 183

Number of Monographs in Homoeopathic Pharmacopoeia of India Volume 4 are

Options:-

- 100, Option ID :- 729 ,
- 105, Option ID :- 731 ,
